EDUCATION

Effat University Bachelor of Computer Science, Cyber Security	2022 - 2026 (expected)
Al-Kon International School High School	2018 - 2022

SCHOLARSHIPS

Granted 50% scholarship, Effat University
Awarded based on outstanding high school and SAT grades, covering half the tuition.

SKILLS

Programming Languages:

Python, C++, Java, SQL, HTML, CSS, JavaScript

Cybersecurity:

Network Security, Cryptography, Zero Trust Architecture, IoT Security, Ethical Hacking, Governance, Risk & Compliance (GRC)

Technical Skills:

Linux, Cisco Networking, Data Structures, Algorithm Analysis, Data Engineering

Artificial Intelligence & Data Science:

Machine Learning, Data Analysis, Predictive Modeling

Core Competencies:

Project Management, Time Management, Leadership, Problem-Solving

PROJECTS

Governance, Risk & Compliance (GRC) in Cybersecurity, 2026

- Conducted cybersecurity risk assessments and compliance gap analysis aligned with GDPR and Saudi PDPL requirements.
- Developed a risk register, incident response plan, and remediation recommendations using the CISO Assistant platform.
- Analyzed cloud security risks and access control weaknesses to improve security governance.

Network Traffic Capture and Security Analysis Using Wireshark, 2026

- Captured and analyzed network traffic to detect plaintext credentials, exposed session cookies, and insecure HTTP communication.
- Applied network security techniques to identify vulnerabilities and attack vectors.

Ethical Hacking and Web Security Assessment Project, 2026

- Performed penetration testing on vulnerable web applications using Kali Linux, DVWA, and SQLi-LABS.
- Identified and exploited SQL Injection (SQLi) and Cross-Site Scripting (XSS) vulnerabilities using manual and automated testing with sqlmap.
- Conducted authentication bypass, database extraction, and remediation analysis for web security vulnerabilities.

PAPERS

Strengthening IoT Security: A Comprehensive Approach to Zero Trust Implementation, 2025

- Reviewed research on IoT security and Zero Trust Architecture.
- Studied authentication and access control methods for IoT devices.
- Identified key security challenges and limitations.

A Comprehensive Study of Security Mechanisms in Software Engineering, 2025

- Conducted a literature review on security integration across the SDLC.
- Evaluated DevSecOps, threat modeling, and static analysis practices.

Innovations in Biometric Security: A Comprehensive Review, 2024

- Reviewed biometric authentication systems and compared key modalities.
- Analyzed security, privacy, and spoofing challenges with real-world case studies.
