

ABEER HUSSAIN

Jeddah, Saudi Arabia
(+966) 50 548 7882 - abeerahrar@gmail.com
<https://abeerahrar.github.io/Portfolio/>

EDUCATION

Effat University Bachelor of Computer Science, Cyber Security	2022 - 2026 (expected)
Al-Kon International School High School	2018 - 2022

SCHOLARSHIPS

Granted 50% scholarship, Effat University
Awarded based on outstanding high school and SAT grades, covering half the tuition.

SKILLS

Programming Languages:

Python, C++, Java, SQL, HTML, CSS, JavaScript

Cybersecurity:

Network Security, Cryptography, Zero Trust Architecture, IoT Security, Ethical Hacking, Governance, Risk & Compliance (GRC)

Technical Skills:

Linux, Cisco Networking, Data Structures, Algorithm Analysis, Data Engineering

Artificial Intelligence & Data Science:

Machine Learning, Data Analysis, Predictive Modeling

Core Competencies:

Project Management, Time Management, Leadership, Problem-Solving

PROJECTS

Network Traffic Capture and Security Analysis Using Wireshark, 2026

- Captured and analyzed network traffic to detect plaintext credentials, exposed session cookies, and insecure HTTP communication.
- Applied network security techniques to identify vulnerabilities and attack vectors.

Java OOP Restaurant Ordering System, 2025

- Designed a secure object-oriented system simulating user authentication and billing workflows.
- Implemented input validation and secure coding practices.

Data Structures and Algorithms Project, 2025

- Designed solutions for complex data structure problems including DSU for tree path counting, frequency-based rank queries, and Euler Tour + Fenwick Trees.
- Implemented in Java with emphasis on efficiency and scalability.

PAPERS

Innovations in Biometric Security: A Comprehensive Review, 2024

- Reviewed biometric authentication systems and compared key modalities.
- Analyzed security, privacy, and spoofing challenges with real-world case studies.

A Comprehensive Study of Security Mechanisms in Software Engineering, 2025

- Conducted a literature review on security integration across the SDLC.
- Evaluated DevSecOps, threat modeling, and static analysis practices.

Strengthening IoT Security: A Comprehensive Approach to Zero Trust Implementation, 2025

- Reviewed research on IoT security and Zero Trust Architecture.
- Studied authentication and access control methods for IoT devices.
- Identified key security challenges and limitations.
